I am a Senior Lecturer/Researcher at the Department of Applied Linguistics at the Faculty of Informatics and Management, University of Hradec Kralove, Czech Republic. My research focuses on various areas of linguistics, such as psycholinguistics (e.g. L2 acquisition and quality of life connected to L2 acquisition at an older age), cognitive linguistics (e.g. intercultural categories and their interpretation) and applied linguistics (e.g. L2 acquisition, ESL, foreign language acquisition). Moreover, I also investigate various topics connected to cognitive and technological aspects of communication and HCI (human-computer interaction) and their implications in higher education. I also research various aspects of human communication manifested in managerial, business and intercultural communication.
